

# QUALITY MANAGEMENT POLICY

**BRC Piling & Foundations' Quality Management System (QMS) which underpins all project planning, programming and execution is ISO 9001:2015 certified.**

Our QMS guides and directs the development of a project or contract specific plan to carry out the work involved, to ensure conformity with the requirements of a project contract and to effectively address and manage all quality risks and assurances.

**BRC Piling & Foundations' core Quality Management objectives are:**

- ☑ Deliver each and every project on time, on budget and without incident.
- ☑ Manage our supply chain to ensure consistent, reliable delivery of high quality products and/or services.
- ☑ Monitor our progress through the measurement and tracking of our agreed corporate and project specific quality KPIs and project or contract milestones.
- ☑ Promote the use of innovative solutions, technologies and construction methods.
- ☑ Ensure our staff, subcontractors and suppliers are appropriately trained and competent to perform the tasks required.
- ☑ Engage all key stakeholders in our projects to address risk and opportunities that may have an impact on the delivery of our services.
- ☑ Adhere to our Inspection Test Plan procedures and processes.

Our QMS is available to all staff and we will communicate our corporate and project specific quality objectives across all mediums, according to the most appropriate method. Our subcontractors and suppliers will operate in strict accordance with our QMS, with procedures and processes adapted to satisfy site and/or client specific project requirements.

BRC Piling & Foundations leadership will establish Quality Management key performance indicators (KPIs) that can be applied across all levels of our business and project team structures. We will review these KPIs annually, together with our QMS and this Policy Statement.
